

Commercial duty, non-toxic Raised Bed Garden Kits for
Community, School, Church Gardens at discount pricing.

*A 25 year, natural,
and..beautiful solution for
community and school
gardens*

Dear Community Garden Organizer:

Eff. 11/1/17 pg. 2

SUBJECT: Special pricing of  raised bed garden kits for Community, School, and Church Gardens.

We enthusiastically support the growth of community and school gardening across the US and Canada. For that effort we are offering deeply discounted pricing to Non-Profit Community Gardens that wish to purchase Durable GreenBed™ raised bed garden kits.

At ShelterWorks here in Philomath, Oregon we have been manufacturing a unique green building block material called Faswall® since 2006. It is a recycled woodchip/cement composite invented in Europe that is cast into blocks for building high performance, sustainable homes and commercial buildings. It is rot-free and non toxic due to the unique mineralization process of the wood fiber. You can learn more about this at www.faswall.com.

Faswall wood/cement building blocks

Seven years ago I had an idea to use this same composite material for a garden planter bed because of its rot free and non toxic features. We took a year to develop Durable GreenBed™ which answers the question for raised bed gardeners: “What do I build the bed out of?” Wood rots, plastic boards are, well, plastic and they don’t stand up to UV, railroad ties are out due to creosote, cement blocks are heavy and unsightly, and pressure treated wood is suspect for vegetable growing. And, most of the available planter beds are not that attractive—simply a wood or plastic box. We created something healthy, durable, and beautiful. I challenge you to find a more attractive, more durable

raised bed garden kit than DurableGreenBed™. All the components are of the highest quality: Faswall® wood-cement panels, extruded aluminum brackets with a baked on architectural grade paint, 1000 hour salt spray tested fasteners, and a beautiful 2x3 cedar wood rail on top finished with a bio based non toxic penetrating oil finish. All holes are pilot drilled or marked for accurate, fool-proof assembly.

Our 2' high Durable GreenBed™ kits are available for your ADA garden area.

Give us a call to discuss your community garden needs and to receive a price quote. More and more community and school gardens are discovering the benefits of DurableGreenBed™ for their projects.

ALL THE BEST to you in your efforts of bringing us closer to one another in our communities and closer to the bountiful earth.

Sincerely,
Thomas Van Denend, General Manager

These are the 6 key features of Durable GreenBed™ that make it a good choice for your community garden:

- 1) **Extreme Durability**-----The Faswall® woodchip/cement composite that forms the Durable GreenBed™ panels was developed in Europe over 65 years ago. It is a proven way to preserve wood fiber so it lasts for decades. We have recently unearthed Faswall® panels after 25 years underground and they have minimal degradation. The rust-free aluminum brackets have a tough baked on architectural grade paint. This all adds up to a raised bed that will not have to be replaced for many years.
- 2) **Non-toxic**-----There is nothing toxic in the Durable GreenBed™ panels to concern the food crop gardener. The wood top rail is finished with a plant oil based stain with natural pigmentation.
- 3) **Breathable**-----The Durable GreenBed™ panels are permeable. Roots get needed air and beds can drain. Evidence that the oxygen exchange through the GreenBed panels contributes to greater plant vigor.
- 4) **Beautiful**-----The Durable GreenBed™ system creates a beautiful border that adds an attractive feature to your community garden that you don't get from utilitarian wood boxes. It has a unique, natural look not duplicated by any other raised bed kit on the market.
- 5) **Quick Set-Up**-----45-90 minutes to assemble (depending on size and provided the site is prepared). Kit is precut, predrilled, and prefinished for accurate, fast installation.
- 6) **Made in the USA**-----Preserving good manufacturing jobs in America.

There are two options for the Community, School, and Church Garden program:

Option 1: Purchase 4x8, 4x12, or 4x16 Durable GreenBed kits. 1' or 2' high.

The 4x8 GreenBed™ Kit

4x8 GreenBed™ Installed

2x3 wood rails are precut and predrilled and finished with a non-toxic bio-based penetrating oil.

(6) no rust aluminum brackets with baked on architectural grade paint. Includes stakes and fastener packet.

(6) GreenBed™ woodchip-cement panels last for decades.

The 4x8x2' high GreenBed kit.

4x8x2' GreenBed™ Installed

Option 2: Purchase the Durable GreenBed panels (contact us for panel minimum) and the aluminum brackets to make Your own layout. You construct a top rail to finish the beds.
For example 60 panels will construct (10) 4x8 beds or (6) 4x16 beds)

12" high standard Durable GreenBed components.

Durable GreenBed™ Panel
45.5" long x12" high x1.875"

Discount Price List for Community, School, Church Gardens.
Other non profits please contact us for eligibility!

For example, Durable GreenBed™ sells at retail garden centers for \$349-\$379 for the 4x8x1' high kit (our best seller). Your community garden price is \$261 per kit. You will not find a raised bed kit of this quality for less!

You qualify for this discount pricing under these two conditions:

- Must be a bonafide community garden with non profit status and not a private individual
- There is a minimum purchase quantity of (6) kits. NOTE that you can combine 4x8, 4x12, and 4x16 kits to achieve the minimum order.
